Rollerscreen

Help protect your staff from Covid-19 with the Rollerscreen

**Next day
dispatch
available**

A low cost, easy to fix and use transparent screen which allows staff working behind counters or cash registers to protect themselves against coughs and sneezes and help to prevent the spread of viruses such as Covid-19.

Ideal for environments such as hardware stores, supermarkets, pharmacies, banks, takeaways and other settings, Rollerscreen fixes to the ceiling and hangs down in place to provide protection for when staff come into contact with the general public.

Option to consider:

We also offer **side guide wiring** to provide with extra rigidity to your install.

Provides protection:

With social distancing in place and the country under lock down, essential businesses have a duty of care to put into place steps to protect their staff from catching Covid-19. Rollerscreen provides that extra protection to help control the virus and provide some additional reassurance for customers as well as staff.

Please see page 2 for more benefits >>

Simple to clean:

Rollerscreen is made from a clear plastic film and plastic components which are easy to clean and sanitise with a mixture of mild detergent diluted with water - just make sure you absolutely dry the screens before rolling up.

Quick to install:

Lightweight and simple to install, you do not need any specialist fitting skills to fit Rollerscreen. In fact, with two people, a drill and a couple of screws you can have this screen up in 10 minutes.

Options to consider:

Rollerscreen can be supplied with a variety of **control options** including; chain or crank.

Made to measure:

Rollerscreen can be made to measure to suit your requirements or pre-set sizes. Please get in touch with your business development manager today for more details or to request a quote.

Easy to use:

The Rollerscreen is operated as standard by a robust plastic wind mechanism with detachable handle which ensures a very smooth blind control. The translucent plastic film is locked into a groove in the barrel, and features a white plastic bottom bar which keeps the screen hanging taut.

Unlike other fixed sneeze screens, the Rollerscreen can easily be wound up and left in situ for when it's next needed
